Protect your family from these harmful elements.

Air pollutants is the main cause of illnesses & diseases.

Smoke

Bacteria & Viruses

Industrial Pollution

Environmental Pollution

World Health Organization (WHO) Statistics 2021:

- Air pollution kills 7 million people worldwide every year.
- 99% of the world's population are breathing in polluted air that exceeds WHO's guideline on the level of pollutants.

IONShield emits 60 Million negative ions

Negative ions are also regarded as vitamins in the air.

The concentration of negative ions more than 10,000/cm³ can enhance the body's natural healing ability.

Sophisticated and stylish pendant 10 grams only

For better health & protection, wear it wherever your go.

Principle of Negative Ion Purification

It uses the built-in carbon brush system to release negative ions into the air.

Negative ions attach to small particles in the air and give them an electrical charge causing them to clump together and fall onto the wall or ground and prevent them from entering our lungs.
